

Instructions

Investigate the major sources of alternative energy available in Australia and internationally. Record in dot points and provide examples where possible to demonstrate knowledge and understanding of the task. Record the internet and journal articles used in the research task.

Type of energy	What is it?	How does it work?	Advantages of Use	Disadvantages of Use	Examples of Use in Australia and Overseas
Geothermal Hot Fractured Rock					
Hydro Electricity					
Landfill					
Solar Thermal					

Solar PV					
Biomass e.g.: Sugar cane					
Wave/tidal					
Wind
