## Analysing the data

**Explain what type of graph you think would be best to represent the data sets. Do you think both data set should be represented the same why? Why?**

**After creating the graphs, calculate the following:**

| Data Set: Flight Time | |
|---|---|
| Mean | |
| Median | |
| Mode | |
| Range | |

| Data Set: Flight Time | |
|---|---|
| Mean | |
| Median | |
| Mode | |
| Range | |

## Creating graphical representation of the Data

### Data set: Longest Flight Time

### Data set: Distance Travelled
