

Analyse Minerals, Ensure Quality, Drive Progress!

# Chemist

Use laboratory equipment to analyse minerals and materials to optimise extraction processes. Develop and implement chemical treatments to enhance resource recovery and minimise environmental impact.

● Site Area  
Processing

● University Pathway  
Bachelor of Science (Chemistry)

● Vocational Pathway  
CERT III in Laboratory Skills

● School Study Areas  
CERT II in Sampling and Measurement  
English  
Mathematics  
Chemistry

**Your Strengths**

- Attention To Detail ✓
- Safety Mindset ✓
- Problem Solving ✓
- Teamwork ✓
- Communication ✓
