

Uncover hidden riches as a geophysicist!

Geophysicist

Collect and interpret geophysical data to aid in mine planning, target exploration areas, and optimise coal and hydrogen extraction processes.

Your Strengths

- Attention To Detail ✓
- Safety Mindset ✓
- Problem Solving ✓
- Teamwork ✓
- Communication ✓

School Study Areas

- CERT II in Autonomous Technologies
- CERT II in Sampling and Measurement
- CERT III in Aviation (Remote Pilot)
- General English
- Literature
- Mathematical Methods
- Specialist Mathematics
- Physics
- Chemistry
- Biology

Site Area

- Planning
- Operations
- Exploration

University Pathway

- Bachelor of Science (Geophysics)
- Bachelor of Science (Geoscience)
- Bachelor of Science (Earth Science)

Vocational Pathway

- CERT III in Surveying and Spatial Information Services
- Diploma of Engineering – Technical
- Diploma of Applied Technologies
